on Riviere du Chien Road)

Long Distance Telephone, Mobile, Ala.:

DAY, 6 - 1727 — NITE, 6 - 9863

SHIPPING POINT, MOBILE 1, ALA.

TERMS AND CONDITIONS OF SALE

PRICES: 5, 50, and 500 of same variety and size at 10, 100 and 1,000 rates, respectively. When the price of a single plant is not listed under "EACH" add 25% to the 10 rate. All quotations are for immediate acceptance and subject to prior sale.

SPECIMEN STOCK, selected or marked by our customers at our nurseries, will be priced at its value.

CARLOAD ORDERS on B & B plants (or if trucks are sent to our nurseries for them, and we do not have to pack the plants) will be very attractively priced.

TERMS of PAYMENT: CASH WITH ORDER, As our banks charge exchange on out of town local checks, please remit in New York Exchange or Post Office Money Order.

C. O. D. shipments will be considered as cash orders only when cash deposit of 25% is sent with order. For charge accounts, our terms are 30 days net, boxing at cost. New charge accounts will be opened after receipt of trade references, allowing time for investigation.

TRANSPORTATION: Please state whether you want your shipment by parcel post, express, or freight. If no instructions are given, we will use our judgment in shipping. We make no charge for delivery to railroad, but our responsibility ceases when goods are turned over to carrier, and risk and cost of transportation belong to purchaser.

PACKING AND BOXING CHARGES — All packing charge fees 10 per cent on amount of invoice to be added on each order.

CONDITIONS OF SALE: We accept all orders upon condition that they shall be voidable at our option should any injury befall our stock before shipment from CAUSES OVER WHICH WE HAVE NO CONTROL.

AZALEAS

Azaleas are, without doubt, the most beautiful flowering plants we have in the South. Their season of blooming is very long, and they are such profuse bloomers that in the Spring each plant is a solid mass of colors.

All types of azaleas are easily grown, if a few simple rules are followed. They require a good, well-drained soil that has a slight acid reaction. The addition of leaf-mold, peat and, in very heavy, stiff soil, a small quantity of sand, is always beneficial. Leaf-mold and peat help maintain an acid soil, and a mulch of leaves is good to retain moisture and furnish plant-food for the next year.

Azaleas are shallow rooted and require an abundance of water in dry weather, especially the young plants. Watering among the foliage with a hose is desirable, as a strong spray holds thrip and red spider in check.

Partial shade is desirable in planting, but dense shade should be avoided. A lath-house is well suited for growing plants in nurseries. They should be fertilized sparingly; a light application of cotton-seed meal about three times a year is one of the best treatments. It should be remembered that plants having a quantity of large sappy growth produce less flowers and are much more likely to be killed by freezing weather than slower-growing plants of the same variety.

Azalea Lath-House

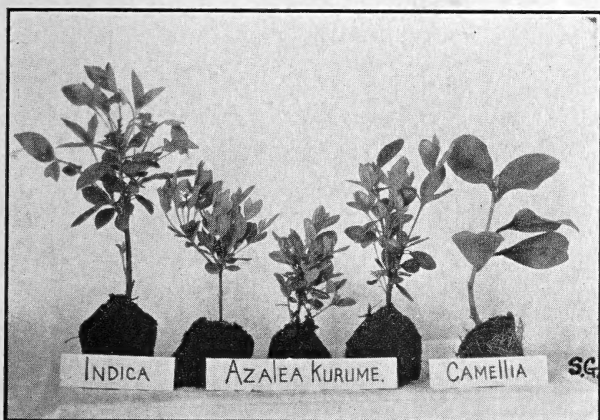

LINING-OUT size azaleas offered here were rooted last Spring and planted in beds early last Summer, given plenty of space for full development of strong root systems and bushy tops. They are far superior to 3-inch potted plants, having roots enough to fill a 3-inch pot which has twice the capacity of a

Packing Charge 10 Per Cent on Amount of
Invoice to be Added.

2½-inch pot. We have thousands of lining-out size azaleas ready for immediate delivery, but since these small plants have much tender growth and are easily damaged by cold, we advise protecting them against frost this Winter. The extra expense of frost-protection will be more than repaid by the better growth you will obtain by early planting, but those who are not prepared to protect them will do well to let us book their orders and ship next Spring, after all danger of frost is over. This service is rendered without any additional expense to our customers.

AZALEA INDICA

The INDICA AZALEAS, which are fast growers with masses of large flowers, are especially adapted for landscape planting all along the Gulf Coast and up the Atlantic seaboard to North Carolina. Around Mobile, nurserymen in this entire section have a golden opportunity to give most lasting satisfaction to their customers. Azaleas will sell themselves when your customers see them in full bloom. We are listing the most important varieties, eliminating weaker growers or inferior flowers when the same color can be had in better varieties.

Lining Out Azaleas

ELEGANS. Fast and rather upright grower, similar to Formosa, with light-pink flowers. **EARLY BLOOMER** and a **HARDY AZALEA INDICA**. Most nurserymen in this section of the country do not realize how greatly their trade will be stimulated by offering this bright, flowering azalea to their customers.

FIELDER'S WHITE. Large, pure white flowers early in season—a strong grower, free blooming and one of the best whites.

Packing Charge 10 Per Cent on Amount of Invoice to be Added.

FORMOSA. Very fast grower with large dark green leaves and big purplish-pink flowers which are less purple than Phoenicia.

INDICA ALBA. Rather upright grower, with dull-colored, hairy leaves and pure white flowers in midseason—very hardy.

PRIDE OF MOBILE. Fast grower with large leaves; similar to Formosa, but has lighter colored flowers. One of the largest and choicest azaleas. This variety was formerly known as "Watermelon-Pink" but is now called "Pride of Mobile". Very hardy, fast grower; most brilliant in color, profuse mid-season blooming makes this one of the outstandingly good and profitable varieties for nurserymen and florists to handle.

HARDY JAPANESE KURUME AZALEAS

Finest forcing Azaleas for FLORISTS

This group, known botanically at *AZALEA OBTUSUM JAPONICUM*, includes varieties that are more dwarf in their habit of growth and hardier than the Indica group. All Kurume Azaleas will stand the Winter of almost all sections of the southern states without any protection. Their popularity is increasing rapidly as they become better known, especially in the cooler sections of the country where the more tender Indica are injured by the cold. Used singly, or in groups by themselves, or in combination with Indica varieties, they give most pleasing landscape effects and offer a range of color that could not otherwise be obtained.

The demand for Kurume Azaleas as "POT PLANTS" for florists has been growing by leaps and bounds. When plants are received from us, all you have to do is to pot them in light peaty soil, keep in moderately warm houses, spray with strong force of water daily to keep down red spiders, and they will come into full bloom in about 60 days. They are a very quick and profitable crop. We are now growing thousands of excellent *KURUME AZALEA FOR FLORISTS*, paying particular attention to the leading florists' *VARIETIES, SUCH AS CORAL BELLS, SALMON BEAUTY, HINO-DEGIRI, SNOW, HEXE, and DOUBLE MAUVE.*

Packing Charge 10 Per Cent on Amount of
Invoice to be Added.

6 to 8-In. *Kurume Azalea*

CHRISTMAS CHEER. Compact grower with small shiny leaves. The flowers, of deepest crimson, are small but very attractive. One of best varieties.

CORAL BELLS. Compact grower with small shiny leaves. The bell-shaped pink flowers are small but very attractive. Very profuse bloomers, and one of the best favorites. Blooming at Christmas, it is one of the most desirable pot-plants.

HINODEGIRI. Slow, compact grower, but its fiery red flowers will literally smother the entire plant, even when very small, making it one of the most desirable pot-plants for Spring.

ORANGE BEAUTY. Compact grower, with orange-pink flowers of hose-in-hose type, and large glossy leaves. Heavy bloomer and good forcer.

SALMON BEAUTY. Large hose-in-hose, salmon-pink flowers and light green foliage. Heavy bloomer and compact grower.

SALMON QUEEN. Large single, salmon - pink flowers are produced in great profusion in mid-season. One of the most attractive Kurumes. Blooms cover entire plants.

SNOW. Pure white, large size hose-in-hose flowers of purest white among beautiful glossy leaves. Easy to force, and fine pot-plants for Easter.

Our Lining-out Azaleas were planted in beds early last Summer to allow plenty of time and space for strong root development. Their root systems equal those of three-inch pot plants. Spring delivery is best for transplanting. We book orders upon receipt of 25% cash deposit.

Packing Charge 10 Per Cent on Amount of Invoice to be Added.

CAMELLIA JAPONICA

The horticultural names of camellia japonica are so badly confused that we are still not sure of many of them, but we have many varieties which are identified by leading nurserymen under the names we list. Therefore, we are offering these named CAMELLIA JAPONICA in three classes.

Many names, however, have yet to be revised, and in order not to mislead you, we are illustrating several types of flowers, and by referring to these illustrations, you can form a better idea of what we mean by "*PEONY FORM*", "*VERY DOUBLE*", etc.

Victor Emanuel

Camellias are not difficult to grow. Many fine old specimen plants are to be found scattered throughout the lower South, where they have been growing for years with little or no care, and thriving on practically all types of land characteristic to the region. However, they do best on a good, well-drained soil that has a slight acid reaction. Good garden soil is

**Packing Charge 10 Per Cent on Amount of
Invoice to be Added.**

suitable, but it can be made better by adding leaf-mold and peat moss. In heavy stiff soils, a small quantity of sand is also beneficial.

In most soils, especially on clay land, cottonseed meal alone, or in a mixture, is an excellent fertilizer. Other good fertilizing materials, which are likewise acid in their reaction, are well-rotted cow-manure, tankage, castor pomace, sulphate of ammonia and muriate of potash.

The Camellia is less subject to disease and insect enemies than most other evergreen shrubs, but sometimes the foliage is attacked by scales. When this occurs, they should be sprayed with a miscible oil preparation and care should be taken to thoroughly wet the underside of the leaves as well as the top. Volk, used in the proportion of 1 part to 50 parts of water, has proven very effective.

Camellias with advanced flower-buds should be kept in a very cool house. Mum, carnation, begonia and cyclamen houses are suitable, with a temperature of not much more than 50 degrees. Camellias are winter-blooming plants and may shed their buds in very warm houses.

Camellia Japonicas are being used more and more as cut flowers by florists. Due to the heavy and increasing demand, we ask that our customers placing large orders specify the varieties wanted before they are sold out. We do not substitute unless requested to do so.

Purple Emperor

Packing Charge 10 Per Cent on Amount of
Invoice to be Added.

CLASS A CAMELLIAS

C. M. HOVEY. In habit of growth, shape and very double of flowers, it is very much like Purple Emperor, but the large red flowers are mottled with white.

Each

12 to 18 in., Grafted Plants, B&B -----	\$3.50
18 to 24 in., Own root Plant, B&B -----	4.50

DAIKAGURA. Probably the earliest bloomer of all CAMELLIA JAPONICAS, in bloom in September and often is showing color in August. Flowers are large, thick peony-type. Deep rose color with large white blotches.

12 to 18 in., Grafted Plants, B&B -----	\$4.50
---	--------

FANNY BOLIS. Very large, single red flowers blotched with white.

18 to 24 in., Own root, B&B -----	\$4.50
-----------------------------------	--------

KUMASAKA. Large, peony-form blooms of deep pink. Late bloomer. One of the finest of all pink varieties. When full open some stamens show through.

6 to 8 in., 3-in. pot -----	1.25
18 to 24 in., Own root plant, B&B -----	4.50

LADY HUME'S BLUSH. A medium-sized full double. Flowers are blush pink, almost white. One of the best for cut flowers for Florists.

12 to 18 in., Own root Plants, B&B -----	4.75
--	------

GOVERNOR MOUTON. Flowers of medium size and blood-red color, often blotched with white. A vigorous grower, rather spreading in habit, with twiggy branches.

6 to 8 in., 3-in. pot -----	.50
3 to 3 ft., specimen, B&B -----	5.00

CLASS B CAMELLIAS

ALBA PLENA. Well-known Camellia. Snow-white, very double, one of the best cut flowers for florist. Very early bloomer, but does not set buds when young.

6 to 8 in., 2¼-in. pot -----	.30
8 to 10 in., 2¼-in. pot -----	.35
18 to 24 in., B&B -----	1.50
